

## IDX Compatibility with Sony Chargers

Questions frequently arise regarding charging IDX batteries on other manufacturer's chargers. Since we have no control over engineering changes made by other manufacturers, we cannot guarantee any compatibility. You are advised to contact the manufacturer to see if they have any test data supporting the ability of their chargers to charge IDX batteries. It is always best to use each manufacturer's charger for that manufacturer's batteries, as we all have specific data communications between the battery and the charger for best performance.

For informational purposes only, there is some old test data regarding some Sony Chargers that could charge IDX ENDURA V-Mount™ batteries, as long as Sony and/or the End-User has not made any changes to them within the last three years.

**BC-M150**

There is also some information regarding Sony V-style batteries that **cannot** be charged on IDX ENDURA chargers. Specifically, the BP1L75 **cannot** be charged on IDX chargers.

### IMPORTANT!

If it is determined that you can charge IDX ENDURA batteries on the Sony chargers listed above, there are some cautions. Please note that the Sony chargers illuminate the green LED upon reaching about 80% of the battery's capacity. Therefore, when charging IDX ENDURA V-Mount™ System batteries on one of the compatible Sony chargers listed above, you should leave the battery attached to the charger for approximately 30 minutes after the green LED illuminates.

IDX chargers do not indicate the full charge LED until batteries reach a minimum of 96% of their capacity. With proper precautions, you will not damage either Sony or IDX batteries charging them on either company's **qualified** chargers.

For a guarantee of continued performance, IDX products should be used only with IDX approved equipment. The use of unauthorized equipment may result in the limitation or voidance of IDX product warranties. IDX does not authorize, condone, recommend, or otherwise assume any liability or responsibility resulting from the use of any battery, charger or accessory not made or sold by IDX. Please use only IDX original equipment.
